

**B85C450EXT instructions for both Key & Grub locking versions.**

The extension bolt is used when you require an overall bolt length over 450mm. Use with any length of the B85C or B85CG concealed bolt to create desired length

This is the B85CG450EXT. Connect the concealed bolt to the end of the concealed extension bolt to make a longer bolt. In this example we adding a 150mm bolt

The end of the extension bolt can fit into the top of any concealed bolts where the tab is.

Unscrew the screw from the concealed bolt and pull the tab out.

Place the end of the extension bolt into the slot where the tab was and screw the screw securely

The overall bolt length now is 600mm. These steps can be repeated with any length concealed bolts
