STEEL WINDOW FITTINGS

Door Locking Range

A range of sash locks provided with faceplates and strikes specific to your door system. Steel Window Fittings' sash/mortice locks operate by using a lock, latch and handle mechanism. These systems are designed for your door to close without locking behind you.

## CLC45W40DRK Door Locking System

# Locking systems for W50TB Door Profiles

The W50TB is a thermally broken profile created to give the narrow sightlines synonymous with steel windows and doors. This gives improved heat retention inside the property.

Steel Window Fittings' locking system fits within the profile without interfering with the properties of the W50TB door.
