STEEL WINDOW FITTINGS

Safety & Restrictors Range

Steel Window Fittings have created safety and restrictors in order to provide additional adjustable features to windows as well as increased security options.

Our silent cabin hooks (pictured right) are able to be fitted to both windows and doors in a range of finishes.

STEEL WINDOW FITTINGS

The logo consists of the lowercase letters 'swf' in a bold, sans-serif font, enclosed within a light green square frame that is slightly offset to the top-left.

STEEL WINDOW FITTINGS

Stainless Steel Tracks

Optimal for windows that require adjustable friction, the stainless steel tracks are fitted to reduce the risk of windows slamming open or shut by tightening or loosening a simple friction screw.

Suitable for top hung or side hung windows in different dimensions.

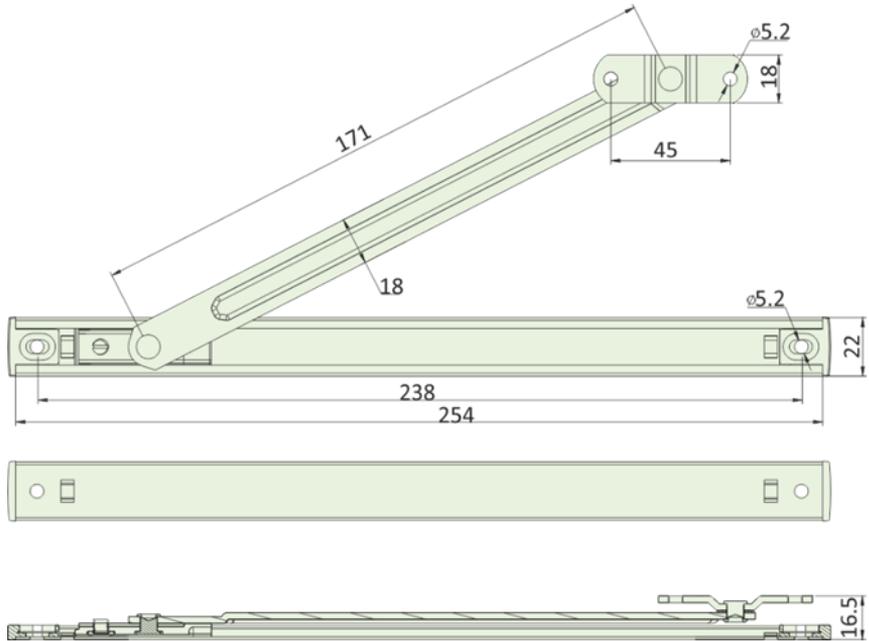

SS178NA

PRODUCT FEATURES & TECHNICAL INFORMATION

- A stainless Steel restrictor which features adjustable friction.
- Can be used to reduce the opening of windows and/or add friction to the window by adjusting the friction screw
- For use on both Side Hung and Top Hung windows
- Suitable for systems which have internal dimension between fixed and moving frame greater than 16.5mm
- Restrictors sold as single items and non-handed
- Suitable for M5 countersunk fixing screws

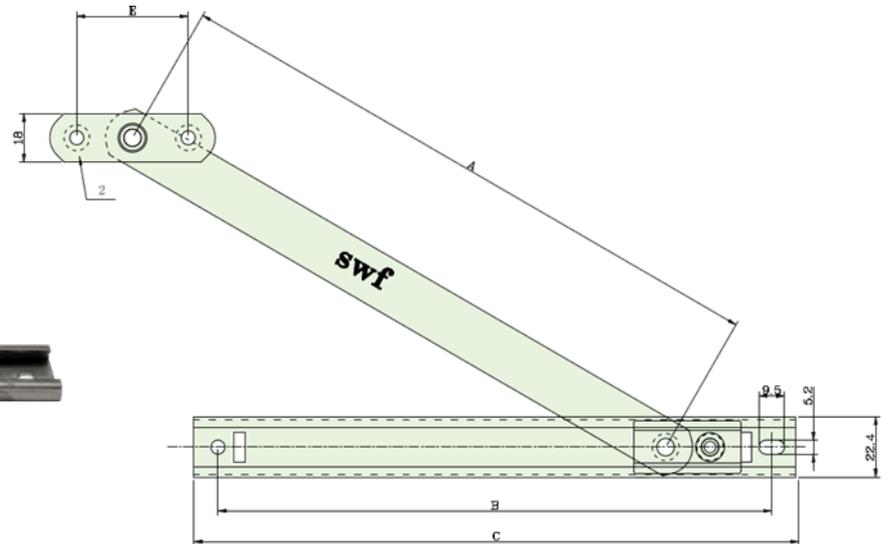

Dimensions

PRODUCT FEATURES & TECHNICAL INFORMATION

- A stainless Steel restrictor which features adjustable friction.
- Can be used to reduce the opening of windows and/or add friction to the window by adjusting the friction screw
- For use on both Side Hung and Top Hung windows
- Suitable for slimmer systems which have internal dimension between fixed and moving frame at 12.5mm
- Restrictors sold as single items and non-handed
- Suitable for M5 countersunk fixing screws

SS178NA-13

Part No.	A	B	C	D	E
SS178-13-6NA	150	160	178	12.5	41.5
SS178-13-9NA	229	206	224	12.5	41.5
SS178NA	171	238	254	16.5	45

Dimensions

The logo consists of the lowercase letters 'swf' in a bold, sans-serif font, enclosed within a light green square frame that is slightly tilted. The background of the entire page is a close-up photograph of a silver metal window restrictor mechanism, showing various bolts, hinges, and a spring component. The top portion of the image is partially obscured by a dark red horizontal bar.

STEEL WINDOW FITTINGS

Restrictors

For windows that require fixing to a certain opening length, Steel Window Fittings offer both releasable restrictors and lockable restrictors that is supplied with an allen key for easy use. For side hung windows only.

The spring dampener is able to be fitted to both windows and doors. These are particularly strong and excellent for environments that experience extreme winds. Lockable with an included allen key.

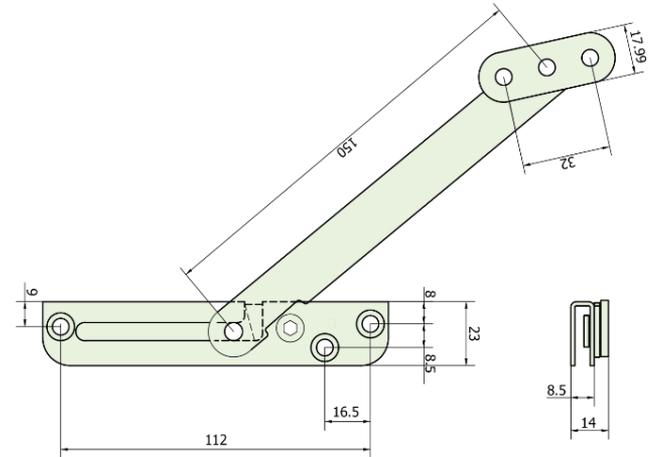

PRODUCT FEATURES & TECHNICAL INFORMATION

- Restrictor for side hung windows which sits inside window section
- For use with a 4mm allen key to lock and release restrictor
- For use on windows
- Restrictors available in left (LH) or right hand (RH)
- Suitable for M5 countersunk fixing screws

S4463 Lockable Concealed Restrictor

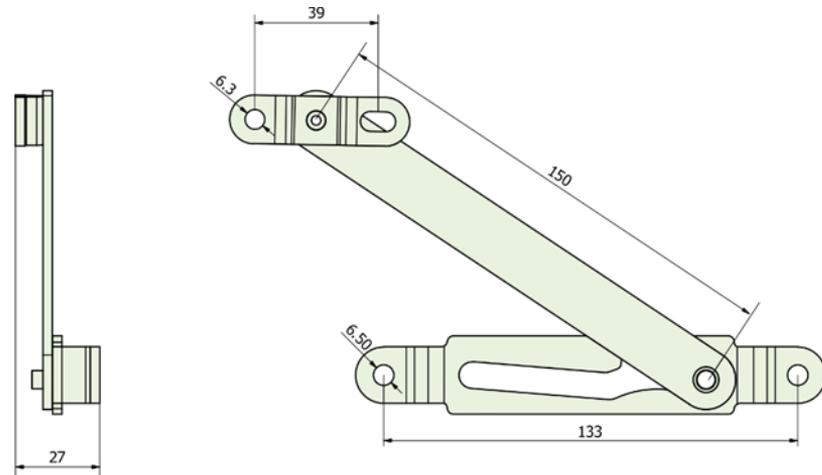

Dimensions

SS571 Releasable Concealed Restrictor

PRODUCT FEATURES & TECHNICAL INFORMATION

- Releasable restrictor often used on bottom hung inward opening windows
- For use on each side of the window to support and hold the window when in open position
- Design of track allows the restrictor to be released once in the open position
- Can be used as a conventional releasable restrictor on side hung windows
- Suitable for systems which have internal dimension between fixed and moving frame greater than 25mm
- Restrictors sold in pairs left (LH) and right hand (RH)
- Suitable for M6 countersunk fixing screws

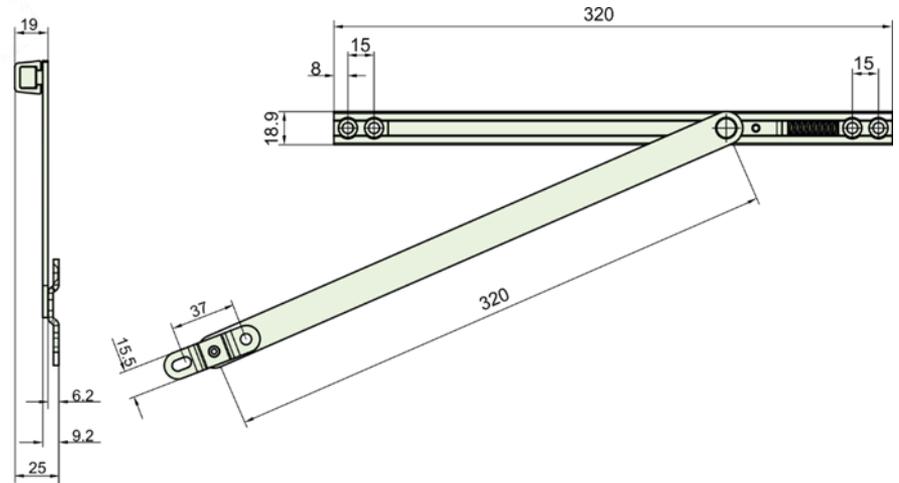

B574D Friction Restrictor with Spring Damper

PRODUCT FEATURES & TECHNICAL INFORMATION

- Features an adjustable friction mechanism using an allen key along with a spring to act as a damper, this allows door or window to be held open at any desired position
- Often used to restrict doors and windows where the opening cannot go above 90 degrees *for example where a window or door is in a brick reveal*
- Particularly useful for all door and window fitted in environments where there is regular and/or risk of strong winds to reduce any damage caused
- Suitable for profiles which have an internal dimension between fixed and moving frame greater than 25mm
- Supplied with a small 2.5mm packer which achieves an overall height suitable for 27.5mm profiles
- Requires both M5 and M6 countersunk fixing screws

Dimensions

Cabin Hooks
